LIST OF ILLUSTRATIONS

Volume LIV, New Series Volume VII

	PAGE
HOGS AND THE TENT CATERPILLAR	
Plate 1. Tent Caterpillar and Uncovered Pupa.....	60
Plate 2. Tent Caterpillar Cocoons Attached to Oak Leaves.....	60
Plate 3. Indigestible mass of cocoon silk and pupæ grass and barley taken from a pig's stomach.....	60
Plate 4. Over three feet of adherent intestinal contents. The cocoon silk fibres matted so that the contents of the stomach, small and large intestines made one long, continuous rope.....	60
PORTRAIT OF DR. VERANUS A. MOORE.....	85
NECROBACILLOSIS IN HORSES AND MULES	
Figure 1. Necrophorus infection in region of pastern and coronet ter- minating in necrosis of lateral cartilage.....	150
Figure 2. Necrophorus infection of hoof starting as thrush.....	151
Figure 3. Necrophorus infection in region of knee. Necrotic tissue has been removed.....	152
A NEW FLUKE FROM THE DOG	
Drawing: Hallum Caninum, Dorsal View.....	255
INSTRUCTORS VETERINARY SECTION OF M. O. T. C., CAMP GREENLEAF, GA.	
Figure 1. Major Wilfred J. Stokes.....	263
Captain Otis A. Longley.....	263
Captain Fonsa A. Lambert.....	263
A PRELIMINARY NOTE ON INFECTIOUS KERATITIS	
Figure 1. Infectious Keratitis.....	309
MONSTROSITIES	
Figure 1. Cephalothoracomphalopagus.....	387
Figure 2. Cephalothoracomphalopagus.....	387
Figure 3. Hydrocephalus.....	388
Figure 4. Diprosopus.....	388
PARASITIC DISEASES	
Figure 1. Dermacentor venustus (male).....	640
Figure 2. Dermacentor venustus (female).....	640
Figure 3. Tick Bite on Neck of Child.....	641
ARMY VETERINARY SERVICE	
Figure 1. Second Lieutenants McCoy, Miller, Golden, Pottle, Matter and Brown.....	653
TANK FOR AIR TREATMENT OF PARTURIENT PARESIS.....	750

Manuscript not used will not be returned unless postage is forwarded.

Subscribers are earnestly requested to notify the Editor immediately upon changing their address, giving the old as well as the new address. *Make all checks or P. O. orders payable to Journal of the American Veterinary Medical Association, Baton Rouge, Louisiana.*

Laboratories AND Laboratory Methods

When laboratories and laboratory methods are being discussed by scientific men who know what they are talking about, The Cutter Laboratory of Berkeley, California, has more than "honorable mention."

It stands out as "The Laboratory That Knows How"—not only how to conduct laboratory processes, by reason of its twenty years' devotion to the production of "Biologics Only," but—

It also knows how to stand four-square on the proposition that there is only one best way to do a thing, and that is the only way thinkable or permissible, regardless of extra cost in time and material.

That is why we do not compete in time or in price with laboratories which make autogenous vaccines "while you wait."

With a variety of culture media which is amazing in the delicate shading off and gradation of one into another, we coax into vigorous growth organisms that either quickly die, or grow feebly, when cultured on the unfavorable soil of the stereotyped forms of media in general use.

So, whether it is an autogenous or regular stock vaccine, or whether it is one of the serums, specify "Cutter's" and you will get the best that experienced specialization and conscientious endeavor can make.

Veterinary Vaccines and Serums are prepared with the same care and scientific skill as products for Human use and are uniformly dependable.

Bacterial Count of Cutter Vaccines, or Bacterins, is in the vaccine, not on the label, and the same may be said of the organisms represented. We have examined Vaccines of absurdly high count (on the labels) which not only did not contain within billions of the count claimed, but also did not contain the organisms called for by the label.

Specify "Cutter's" always, but, better still, order direct from The Cutter Laboratory, Berkeley, California, or Chicago, Illinois; you will get products true to label, made by

"THE LABORATORY THAT KNOWS HOW"
